

FloSafe Consulting LLC

Healthcare Facility Cross-Connection Control Design Review Services

Healthcare Facilities • Patient Safety • Title 22 Compliance • ASHRAE 188

FloSafe Consulting LLC provides specialized cross-connection control review, healthcare water-system risk mitigation, and regulatory coordination services for hospitals, surgery centers, dialysis facilities, laboratories, and critical-care environments.

Phased Review Services

PHASE 1 Early Design Coordination	PHASE 2 Plan-Set Review	PHASE 3 Construction Review & Support	PHASE 4 Final Verification & PWS Submittal
---	----------------------------	---	--

Why FloSafe for Healthcare Projects

- Patient safety & infection-control awareness
- Healthcare equipment hazard classification expertise
- ASHRAE 188 water-management integration
- Title 22 and PWS coordination support
- Reduced risk of redesign and delayed occupancy
- Collaborative coordination with MEP design teams

Example Project ROI

During early design review for a mission-critical facility, FloSafe identified approved air-gap separation opportunities that eliminated several unnecessary RP assemblies while maintaining full compliance and operational reliability.

Savings Item	Estimated Value
Eliminated unnecessary RP assemblies	\$12,000
Reduced lifecycle testing costs	\$36,000
Avoided long-term replacement costs	\$15,000–\$20,000
Total Estimated Lifecycle Savings	\$63,000–\$68,000

Early hazard assessment also helped avoid plan-check corrections, potential construction delays, and costly redesign coordination.

Representative Project Pricing

- TYPE A — Outpatient / Small Healthcare Facility: \$9,000–\$12,500
- TYPE B — Mid-Size Hospital / Specialty Facility: \$19,000–\$26,000
- TYPE C — Large Hospital / Medical Campus: \$34,000–\$46,000
